Please find below and/or attached an Office communication concerning this application or proceeding.

The time period for reply, if any, is set in the attached communication.

Notice of the Office communication was sent electronically on above-indicated "Notification Date" to the following e-mail address(es):

uspto@ti.com

Office Action Summary	Application No.	Applicant(s)	
	10/635,597	CUI ET AL.	
	Examiner	Art Unit	
	Jaime Cardenas-Navia	3624	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE *3* MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

1)☒ Responsive to communication(s) filed on *02 September 2009*.

2a)☒ This action is **FINAL**. 2b)☐ This action is non-final.

3)☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

4)☒ Claim(s) *1-14* is/are pending in the application.

4a) Of the above claim(s) _____ is/are withdrawn from consideration.

5)☐ Claim(s) _____ is/are allowed.

6)☒ Claim(s) *1-14* is/are rejected.

7)☐ Claim(s) _____ is/are objected to.

8)☐ Claim(s) _____ are subject to restriction and/or election requirement.

Application Papers

9)☐ The specification is objected to by the Examiner.

10)☐ The drawing(s) filed on _____ is/are: a)☐ accepted or b)☐ objected to by the Examiner.

Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).

Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).

11)☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

Priority under 35 U.S.C. § 119

12)☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).

a)☐ All b)☐ Some * c)☐ None of:

1.☐ Certified copies of the priority documents have been received.

2.☐ Certified copies of the priority documents have been received in Application No. _____.

3.☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).

* See the attached detailed Office action for a list of the certified copies not received.

Attachment(s)

1) ☐ Notice of References Cited (PTO-892)
2) ☐ Notice of Draftsperson's Patent Drawing Review (PTO-948)
3) ☐ Information Disclosure Statement(s) (PTO/SB/08) Paper No(s)/Mail Date _____
4) ☐ Interview Summary (PTO-413) Paper No(s)/Mail Date. _____.
5) ☐ Notice of Informal Patent Application
6) ☐ Other: _____.

DETAILED ACTION

Introduction

1. This **FINAL** office action is in response to communications received on September 2, 2009. Claims 1, 6-8, 13, and 14 have been amended. Claims 1-14 are currently pending.

Response to Arguments

2. Applicant's arguments have been fully considered by the Examiner. In particular, Applicant argues that:

(A) regarding independent claims 1 and 8, neither Worthington nor Lofton teaches or suggests attaching a link to the time management entry and displaying the link on a display of the hand-held computer device calculator; and

(B) regarding all dependent claims, they are allowable as per their dependency on the independent claims.

Regarding argument (A), Examiner respectfully disagrees. Par. 23 of Lofton teaches linking a variety of documents to an event entry, by displaying a link on the calendar entry. An example of displaying and using link is provided in par. 112.

Regarding argument (B), Examiner relies on the argument above.

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

> (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

4. **Claims 1-5 and 8-12 are rejected under 35 U.S.C. 103(a)** as being unpatentable over Worthington (US 6,442,527 B1) in view of Lofton (US 2003/0154116 A1).

Regarding claim 1, Worthington teaches:

A hand-held calculator comprising a processor, memory, and a medium storing software (col. 3, lines 52-55, laptop computer is a hand-held computer device, it is old and well-known for steps to be stored in software) that causes the processor to perform the following steps:

a. create a time management entry in a time management application (col. 1, lines 61-64, col. 2, lines 24-33).

Worthington does not expressly teach:

b. attach a link to the time management entry; and

c. display the link on a display of the hand-held calculator.

Lofton teaches:

b. attach a link to the time management entry (par. 23, lines 1-14, par. 112, lines 1-15); and

c. display the link on a display of the hand-held calculator (par. 112, lines 1-15).

The inventions of Worthington and Lofton pertain to scheduling time management entries in a time management application. All the claimed elements were known in the prior art and one skilled in the art could have combined the elements as claimed by known methods with no change in their respective functions, as Lofton does not teach away from or contradict Worthington, but rather, teaches an additional feature that was not addressed. Additionally, the

combination would have yielded predictable results to one of ordinary skill in the art at the time of the invention. Thus, it would have been obvious to combine the teachings, motivated by the fact that additional information is sometimes desired for certain appointments and tasks, such as the example for directions to a scheduled soccer game taught by Lofton (par. 112, lines 5-7).

Regarding claim 2, Worthington teaches wherein the time management entry is an appointment in the time management application (col. 2, line 30, col. 5, lines 49-55).

Regarding claim 3, Worthington teaches wherein the time management entry is a task in the time management application (col. 2, lines 31, col. 5, lines 49-52, 55-58).

Regarding claim 4, Worthington teaches wherein the time management applications is a calendar, and wherein the task is listed in an assignments due list managed by the calendar time management application (col. 2, line 31, col. 5, lines 49-58, Figures 4 and 5).

Regarding claim 5, Worthington does not teach wherein time periods in the calendar time management application are class periods.

Lofton teaches wherein the time periods in the calendar time management application are class periods (par. 127, lines 7-10).

The inventions of Worthington and Lofton pertain to scheduling time management entries in a time management application. All the claimed elements were known in the prior art and one skilled in the art could have combined the elements as claimed by known methods with no change in their respective functions, as Lofton does not teach away from or contradict Worthington, but rather, teaches a specific embodiment that was not addressed. Additionally, the combination would have yielded predictable results to one of ordinary skill in the art at the

time of the invention. Thus, it would have been obvious to combine the teachings, motivated by the advantage in ease of use provided by tailoring the invention to an educational environment.

Examiner officially notes that calling the time periods class periods is nonfunctional descriptive material, because it does not alter the article, and the application would be operable in the same manner regardless of if the time periods are class periods, work shifts, etc. Thus, this nonfunctional descriptive material will not distinguish the claimed invention from the prior art in terms of patentability.

Regarding claims 8-12, Worthington teaches that the invention can be embodied in a data processing unit, such as a laptop computer (col. 3, lines 52-55). It is thus old and well-known if not inherent that a laptop computer would contain a processor, a memory coupled to the processor, a storage medium coupled to the processor, a display, and would be able to run software that would perform the steps of claim 8. It is also inherent that a laptop is a portable computing device. It is also well-known that a laptop is a calculator. Claims 8-12 are rejected using the same art and rational as used above in rejecting claims 1-5.

5. **Claims 6-7 and 13-14 are rejected under 35 U.S.C. 103(a)** as being unpatentable over Worthington (US 6,442,527 B1) in view of Lofton (US 2003/0154116 A1), further in view of Johnson JR. (US 2004/0078752 A1).

Regarding claims 6 and 13, neither Worthington nor Lofton teach wherein the attached link's association with the time management entry is indicated with a graphical icon in the application near the time management entry.

Lofton teaches wherein the attached link's association with the time management entry is indicated in the application near the time management entry (par. 112, lines 1-15).

Johnson JR teaches that the time management entry is indicated with a "document reference or document identifier" (par. 42, lines 4-8). Though Johnson JR does not specifically teach "graphical icon," "graphical icon" is an obvious variation of "document identifier."

The inventions of Lofton and Johnson JR pertain to attaching files to scheduled calendar events. All the claimed elements were known in the prior art and one skilled in the art could have combined the elements as claimed by known methods with no change in their respective functions, as Lofton and Johnson JR do not teach away from or contradict Worthington, but rather, elaborate on a detail that was not addressed. Additionally, the combination would have yielded predictable results to one of ordinary skill in the art at the time of the invention. Thus, it would have been obvious to combine the teachings, motivated by the improvement in aesthetics and ease of use.

Examiner officially notes that specifying that the file attached to the time management entry is indicated with a graphical icon is nonfunctional descriptive material, because it does not alter the article, and the application would be operable in the same manner regardless of how the file attached to the time management entry is indicated. Thus, this nonfunctional descriptive material will not distinguish the claimed invention from the prior art in terms of patentability.

Regarding claims 7 and 14, neither Worthington nor Lofton teach wherein a user is able to activate the application associated with the attached link and view the attached link by selecting the graphical icon.

Lofton teaches wherein the user is able to activate the application associated with the attached file and view the attached file by selecting the link (par. 112, lines 1-15).

Johnson JR teaches that the time management entry is indicated with a "document reference or document identifier" (par. 42, lines 4-8). Though Johnson JR does not specifically teach "graphical icon," "graphical icon" is an obvious if not inherent variation of "document identifier."

The inventions of Lofton and Johnson JR pertain to attaching files to scheduled calendar events. All the claimed elements were known in the prior art and one skilled in the art could have combined the elements as claimed by known methods with no change in their respective functions, as Johnson JR and Lofton do not teach away from or contradict Worthington, but rather, elaborate on a detail that was not addressed. Additionally, the combination would have yielded predictable results to one of ordinary skill in the art at the time of the invention. Thus, it would have been obvious to combine the teachings, motivated by the improvement in aesthetics and ease of use.

Conclusion

6. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37

CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.

7. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Jaime Cardenas-Navia whose telephone number is (571)270-1525. The examiner can normally be reached on Mon-Fri, 10:30AM - 7:00PM EST.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Bradley Bayat can be reached on (571) 272-6704. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
